	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Correctly calculates each expense, equal split, and payment ● Keeps tracks of all the input data for the trip ● Shows how much each person owes after each payment or expense ● Outputs a summary at the end of each trip	**Schedule - (For V2.0+)** ● Ability to add custom splits ● Going back and editing expenses/payments ● Personal and group budget tracking update after each expense ● Modify group sizes in the middle of a trip
Not Important	**Delegate - (Use a library)** ● Use Java's Serializable interface to store and retrieve the data ● Use Java's LocalDate class to handle the dates of expenses and payments ● Use Scanner or Java's IO.readln method to take in and work with input	**Delete - (Cut it)** ● A GUI to make it easier visually to see the splits ● Personal dashboard of everything you owe, money spent, etc. ● Group/user login so others can't add expenses.
